

Woodworking Plan Index

For

Ted's Woodworking Plans

Assembled by Andy Sheldon – 20 February 2011

Sheldon Designs

Subject: Free Copy of Ted's Woodworking Plan Index.

20 February 2011

Hi... Andy here,

If you have downloaded Ted's plans you already have noticed how many plans were actually in all those files. By the way, if you haven't downloaded the woodworking plans and are using this index to see what is available, and you decide to get all these plans, [you can get them here \(my affiliate link\)](#). Anyway...

When I first saw how much came with the plans, I was completely overwhelmed. So I just started with two of the files. First was the PDF, "*Woodworking-Plans-1600-pages.pdf*" and the second was "*WoodWorkingPlans.zip*". The zip file contains 4 files, two of which are woodworking plans: "*WoodWorking Plans - Part1.pdf*", and "*WoodWorking Plans - Part2.pdf*". Part 1 and Part 2 are almost the same as the first 1600-pages file, but with some differences.

I thought it would be great to build an Adirondack chair. Good weather is going to come soon and the thought of lounging about, reading outdoors in a chair I made myself would be great fun. Well, after a bit of browsing, I did find the chair plans, but also realized that it would have been much easier if I had a category index and an alphabetical index to all those plans. At least for me, it is a lot faster to find something in an ordered index, and then go right to the proper page than it is to go page by page through a PDF. And I really did not want to print out all 1684 pages.

So here is what I have done. In the pages that follow, I have made a page number index, a category index and an alphabetical index of the three PDF files I mentioned above. And they are yours with my compliments. If you are looking for something specific (*like I was with the Adirondack chair*), the alphabetical index would be the quickest. If you are looking in a general category (like chairs), the category index would be best.

If you have not downloaded all Ted's plans, this index will give you a glance at what is available. Bear in mind that there is a bunch more than the three files that I have indexed. There are woodworking tips, guides, etc. as well as some larger plans for sheds, barns, and much more.

[You can get Ted's plans here \(my affiliate link\)](#).

Best,
